EXPERIENCE

SQL Developer and Trainer

Cupule Technologies Pvt. Ltd

03/2024 - Present

- Design relational databases in MySQL and PostgreSQL, applying normalization, keys, constraints and ACID principles for stable, reliable data storage
- Write and review complex SQL statements, including those used by an application, checking them for correctness and efficiency
- Built a booking web application on a PostgreSQL schema, connecting application screens to the database and supporting its data requirements
- Prepare documentation and specifications: database design documents, ER diagrams, SQL scripts, and schema audits against requirement documents (SRS)
- Troubleshoot database errors and incorrect query results, and apply best practices to prevent similar issues
- Moved schema designs between PostgreSQL and MySQL, adapting SQL syntax and structures to each database
- Train and mentor 60-70 students in SQL and relational-database best practices, from fundamentals to advanced topics

Data Analyst Intern

Cupule Technologies Pvt. Ltd

Date period

- Analyzed business data using SQL and Python to produce insights, reports and visualizations for decision-making

SETURA: Intercity Bus Booking Platform (PostgreSQL) Developer

Setura

Date period

- Designed multiple tables normalized schema with ER diagrams, keys and constraints
- Audited it against the SRS and populated it with sample data
- Built a multi-screen booking web application on the database
- Wrote complete database design documentation

Bus Booking Data Analysis

Company Name

Date period

- Wrote business-analysis queries on a database covering revenue, seat occupancy, payments, cancellations and coupon usage

Sales Analysis

Zepto

Date period

- Analyzed public sales data to study pricing, discounts and inventory patterns

RAG Chatbot

Company Name

Date period

- Built a RAG chatbot that answers questions from PDF documents
- Developed an agent that writes and fixes its own code

SUMMARY

SQL Developer Data Analyst SQL Developer with 2+ years of experience designing relational databases, writing and reviewing SQL statements, documenting database structures and troubleshooting database issues in MySQL and PostgreSQL. Comfortable working across SQL dialects and applying relational-database best practices such as normalization, keys and constraints. Designed a multiple tables schema with full documentation and a working booking application on top of it, and wrote business-analysis queries on a database. Detail-oriented, able to explain technical concepts clearly, and focused on preventing problems before they occur.

LANGUAGES

English

Hindi
Advanced

SKILLS

SQL

complex queries

joins (inner, outer, self, cross)

subqueries aggregate functions

CTEs window functions views

stored procedures cursors

MySQL PostgreSQL

Relational databases

MySQL PostgreSQL

database design normalization

primary and foreign keys constraints

ACID properties ER diagrams

EDUCATION

B.Sc. in Mathematics

Bundelkhand University

2021 - 2024 Jhansi, India
