Professional Summary

SQL Developer and Data Analyst with 2+ years of hands-on experience in MySQL and PostgreSQL, covering multi-table joins, CTEs, window functions, schema design and reporting queries. Designed and documented a normalized PostgreSQL schema for an intercity bus booking platform, and analyzed payment, revenue, cancellation and coupon data to measure revenue, seat occupancy and payment outcomes. Trained and mentored 60-70 learners in SQL, which built strong skills in query debugging, clear documentation and explaining data to non-technical audiences.

Technical Skills

- **SQL:** inner, outer, self and cross joins across multiple tables; subqueries; aggregate functions; CTEs; window functions; views; stored procedures
- **Databases:** MySQL, PostgreSQL; schema design, normalization, keys and constraints, ER diagrams
- **Data Analysis and Reporting:** data cleaning, data transformation, business-analysis queries, operational reporting, Matplotlib visualization
- **Python:** data analysis, data cleaning, visualization
- **Data Quality:** validation, accuracy and integrity checks, anomaly detection, query debugging and performance checks
- **Documentation:** database design documents, ER diagrams, SQL scripts, requirement (SRS) audits
- **Additional:** machine learning, RAG pipelines, LangChain, LangGraph, OpenAI and Anthropic APIs

Professional Experience

SQL Developer and Trainer | Cupule Technologies Pvt. Ltd. | Sep 2024 - Present

- Write complex SQL (multi-table joins, subqueries, CTEs, window functions) to extract, transform and report on booking, payment, revenue and cancellation data.
- Designed and built realistic multi-table databases (e-commerce, bus booking) with sample data, plus a library of analytical queries used for reporting and learner assessment.
- Audited schemas against requirement documents (SRS) and enforced accuracy through constraints, validation checks and data cleaning.
- Debugged incorrect query results and errors by tracing joins, filters and aggregations, reducing repeat mistakes in reporting.
- Trained and mentored 60-70 students in SQL through hands-on exercises, debugging sessions and graded assessments.
- Maintained clear documentation of database designs, ER diagrams and SQL scripts for team handover.
- Planned and delivered database and AI-agent projects independently, including a multi-agent customer service system built in Python.

Data Analyst Intern (6 months) | Cupule Technologies Pvt. Ltd. | Mar 2024 - Sep 2024

- Analyzed business data with SQL and Python to produce reports, insights and visualizations that supported data-driven decisions.

Projects

Bus Booking Data Analysis | MySQL

- Wrote business-analysis queries joining bookings, payments, cancellations and coupons tables to measure revenue, seat occupancy and payment outcomes.

Intercity Bus Booking Platform (SETURA) | PostgreSQL

- Designed a normalized multi-table PostgreSQL schema with ER diagrams, keys and constraints.
- Audited the schema against the SRS and populated it with sample data for testing.
- Authored complete database design documentation covering tables, relationships and constraints.

Zepto Sales Analysis | SQL

- Analyzed public sales data to study pricing, discount and inventory patterns.

RAG Chatbot and Code-Generation Agent | Python

- Built a RAG chatbot that answers questions from PDF documents, and an agent that writes and fixes its own code.

Education

B.Sc. in Mathematics, Bundelkhand University, 2024

Languages

Hindi, English
